Ecommerce Sales Dashboard

- **Overview**
  - The E-commerce Sales Dashboards project aimed to provide comprehensive insights into e commerce sales performance through interactive and visually appealing dashboards developed using Power BI.
- **Objective**
  - To analyze e-commerce sales data using Power BI and derive actionable insights for business decision-making. This dashboard helps stakeholders track key metrics such as revenue, quantity sold, profit, category performance, customer behavior, and seasonal trends.
- **Dataset Overview**
  - **Details**
    - Order ID — A unique ID for each customer order.
    - Amount — Total amount (₹) the customer paid for the order.
    - Profit — Earnings made after subtracting cost from the amount.
    - Quantity — Number of items sold in that particular order.
    - Category — The main product category (e.g., Electronics, Fashion, Furniture).
    - Sub-Category — A more specific type of product under the main category.
    - PaymentMode — Method used by the customer to pay (e.g., UPI, Credit Card, COD, EMI).
  - **Orders**
    - Order ID — A unique code assigned to each order placed by a customer.
    - Order Date — The date when the customer placed the order.
    - Customer Name — The name of the person who placed the order.
    - State — The state in which the customer is located (e.g., Maharashtra, Delhi).
    - City — The city within the state where the customer lives (e.g., Mumbai, Pune).
- **Key Business Questions Answered**
  1. Which states contribute the most revenue?
  2. Which product categories and sub-categories are top-performing?
  3. What are the sales trends month-over-month?
  4. Who are the top customers by sales?
  5. What are the most used payment modes?
  6. In which months do we gain/lose profit?
- **KPIs (Displayed as Cards in Dashboard)**
  - Total Revenue generated
  - Total Quantity sold
  - Overall Profit achieved
  - Per Unit AOV
- **Insights You Can Derive**
  - Printers are the most profitable sub-category.
  - Maharashtra leads in sales by state.
  - COD (Cash on Delivery) is the most preferred payment mode.
  - Clothing is the highest selling category (63% share).
  - Profit dips during May to August, indicating a possible seasonal decline.
  - Top customers like Harjeet, Mohan, and Madam Mohan contribute a major chunk of sales.
